

DECORATIVE COLLAR

MODEL LS5C

The Decorative Collar style features our distinctive and updated ball-and-socket fitting, with its sharp lines and strong visual presence reminiscent of early European plumbing fixtures. This component provides strength and stability, and imparts a classic design element to this model. The crisply machined decorative collars repeated at the floor and underneath the corner joint afford a traditional and timeless feel for today's finer bathrooms.

(Shown with optional shelf supports, optional hotel-style shelves, and optional auxiliary towel rails.)

Palmer Consoles are completely modular and custom built to any design and leg configuration
